(Chief Officer)

Mapusa Municipal Council

14. Water storage tanks shall be provided with mosquito proof lids and over flow pipes. The tanks should be provided with access ladders wherever necessary.
15. The drains surrounding the plot if any should be constructed with PCC and should be covered with removable RCC precast slabs of sufficient thickness and sizes.
16. The Licensee should gift the road widening area to the council before applying for the Occupancy certificate, if the applicant has utilized the extra FAR in lieu of the road widening affecting the plot.
17. The Licensee should plaster and paint the building internally as well as externally before applying for Occupancy certificate. Exposed brick / laterite / concrete / stone / ashlar masonry finish to buildings will also be permitted.
18. Access up to the entrance of the building is to be paved and is provided with drainage facilities.
19. Space for parking of vehicles should be clearly demarcated on the ground.
20. No Restaurants/Bars will be permitted in the shops unless a separate soak pit is provided besides conforming to the rules in force i.e. without obtaining Occupancy Certificate
21. No commercial activities will be permitted in the shops unless a separate permission to this effect is obtained from this Council.
22. All temporary sheds/existing buildings shown to be demolished in the plan should be demolished before applying for Occupancy certificate.
23. Fire Escape staircases, if applicable shall be constructed as indicated in the approved plans.
24. All internal courtyards should be provided with drainage outlet.
25. The Licensee should maintain all existing natural drains in the plot and should not block them at any stage.
26. No soak pit or other structures should come in the road widening area.
27. The plot boundary should be cordoned off by continuous sheet fencing either of wood or metal during the construction period.
28. The construction of compound wall should not obstruct any pathway or any public access. The Licensee shall make necessary arrangements for smooth flow of rain water by keeping adequate openings in the compound wall for the purpose.
29. No gates shall open outwards on to the road.
30. The construction of the compound wall should be as per the approved plan. The Licensee shall inform this council after the completion of the compound wall.
31. The Licensee shall undertake construction for composting station / Recycling station within the premises for treatment and disposal of biodegradable Municipal Solid waste, as per design and size approved by the Mapusa Municipal Council before applying for Occupancy Certificate.

  
Clen Madeira  
(Chief Officer)

Mapusa Municipal Council

32. Storage of water should be done in such a way that mosquito breeding doesn't take place either by introducing fish in the tanks / wells or properly covering the iron drums / plastic tanks etc. or by observing dry day once a week.
33. Overhead tanks / sumps are to be provided with mosquito proof lids and other pipe fittings without any hole for the entry of mosquitoes. Outlet is to be covered by muslin / wire mesh. Ladder for inspection of the tank to be installed if required.
34. Curing water collection should be treated with anti-larval chemicals by the Licensee.
35. Labourers to be provided with basic amenities like proper shelter, water for drinking and domestic purposes including proper sanitary conditions including toilet facilities.
36. Not to engage labourers for any construction / building work unless they are screened for malaria and possess health cards. These cards are to be renewed every 3 months. Also arrangement should be done to get their blood tested immediately in case of fever and ensure that full treatment is taken in consultation with National Vector Borne Diseases Control Programme.
37. To fill the pits, ditches, water pool etc to avoid stagnations and to ensure no mosquito breeding sites in and around specially in unused items like tyres, bottles, tins etc.
38. All septic tanks / soak pits to be constructed as per the specifications required with proper mosquito proof arrangements so that there is no overflow / leakage that could give rise to stagnation and breeding of mosquitoes.
39. Drains / Nallahs to be maintained clean around the site so that there is no blockade to flow of water. The Gradient should be proper for drainage / flow and also proper cleaning of water should be done.
40. The Licensee shall be fully responsible for structural stability of the building for which this licence has been granted.
41. The Licensee and his architect / engineer shall be fully responsible to ascertain, before commencement of construction work, the correctness of dimensions, areas, location, exact position of the plot or land on which construction is proposed. The Chief Officer and/or officials of this council shall in no way be responsible for correctness of plot/land dimensions at any stage. If required, Licensee may obtain demarcation order from competent authority prior to commencement of work.
42. The Licensee and his architect / engineer shall be fully responsible to ascertain, before commencement of construction work, the technical feasibility of the plot or land on which construction is proposed so that structure/ construction is stable, sound and safe. The Chief Officer and/or officials of this council shall in no way be responsible for the same. If required, Licensee and his architect / engineer may obtain opinion or report from experts.
43. The Licensee shall take adequate precautions for the safety of workers/labours and all others involved in the construction work.
44. This construction licence is issued based on the condition that LICENSEE and HIS ENGINEER shall be solely responsible for the stability of structure and safety of all concerned and the Chief Officer and his all officials are indemnified against any civil and or criminal liabilities and or any kind of liability whatsoever in the event of any untoward incident or structural failure/collapse.
45. The Licensee, his engineer and architect shall take all necessary steps to see that structure is sound, safe and stable.
